

Gorge Handweavers main project is the continuation of weaving fabric for Timberline project, they are at 9 ft of 2nd warp. They had some problems this time that took a little longer to trudge along, such as a non working break. But they are on a roll now.

The head up to Timberline on 10/13 to meet up with Friends of timberline to discuss further weaving and getting another structure to do. "Friends" will hopefully realize what great need it is and will plan some money to go towards this.

We have our Krogshrad class set for November and have 13 signed up at this time... It will be done by zoom by Debbie Greenlaw and this is using the Wego scholarship we won for the year.

This will be my last meeting as a Wego Rep for them and do not have a replacement as of yet, but will get the results of class to you
