

10/14/25 WeGO Guild Report

Hello from Klamath Spinners and Weavers Guild!

We don't have meetings in the summer, but one fun thing a couple of us did was to have a display at the new local Yak farm as part of a "farms tour", with Liz's beautiful felted pots and panels, her demo creating a felted yak picture, as well as a spinning wheel and some natural dyed yarns and processed yak fibers. We also had spinning demo and solar dyeing natural dyes in front of our new LYS called "Unwind" at Saturday Market, and a series of fibery events planned by Kelly in collaboration with the owner also on Saturday Market day, and a spinning demo in Sprague River in July.

After the summer off from meetings, we resumed in September with a discussion about how to have more Guild participation in events in the community, and appointed one member to gather and alert us of events that we can participate in. Our October meeting was spinning wheel maintenance. We're still trying to plan the rest of the year with Basket weaving, something in advanced weaving and an interesting rug making technique...

I'm not versed in including photos, but they are on our website on Facebook Klamath Spinners and Weavers...
